General Overview

EVE Suite is the home and building automation software that allows to simultaneously manage any technology supported by the platform, enable the design of custom user interfaces, logical operations, scenes, and schedules. Not only, EVE Suite collects data, creates reports, manages energy, permits the scheduling. The user interface is completely customizable. EVE is multi-language with particular focus on right-to-left languages (Arabic, Persian, Hebrew), Chinese and Russian. The free EVE Remote Plus app for mobiles/desktops iOS, Android and Windows allows to control your smart building from anywhere.
