KNX home & building

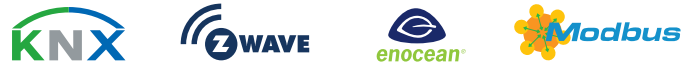

A complete KNX solution

Simple control of houses and buildings with EVE X3 Server

EVE X3 is a multi-protocol server which allows the control and supervision of electrical installations, suitable for residential, commercial and industrial applications.

EVE X3 is affordable, easy to install and it proudly wears the label: "Designed and manufactured in Italy". Functions are handled through a simple and elegant highly customizable interface. EVE X3 allows the remote control of buildings using iPhone, iPad, Android smartphone / tablet, Windows Pc or Mac.

ILEVIA is the supplier of the software, hardware and expertise, a single source of smart home excellence.
