Building Automation

eve

Reliable multibus gateway
for systems integration

A COMPLETE HOME AUTOMATION SYSTEM

EVE can **manage several different protocols** at the same time and **run logical tasks**. EVE is compatible with the most **well-known protocols** for home and building automation, both **standard** and **proprietary**.

- Lights, Dimming
- Blinds, Shutters control
- Doors, Garage doors, Gates
- Multiroom Audio/Video
- HVAC management
- Security and IP Cameras
- Loads control and reports
- E-mail / SMS notifications
- Energy graphs
- Scenes management
- Generic timers
- Garden irrigation

ENJOY YOUR SMART BUILDING

You can use the **free EVE app** with any mobile device - *iPhone*, *iPad*, *Android* smartphones and tablets. It is also possible to control the installation from your desktop - *Mac OSX* or *Windows OS*. You can install the EVE app on **as many devices as you want**, with no limitations, free of charge.

Access the installation by using the user interface style you prefer: **Classic** or **Map**.

CLASSIC Style
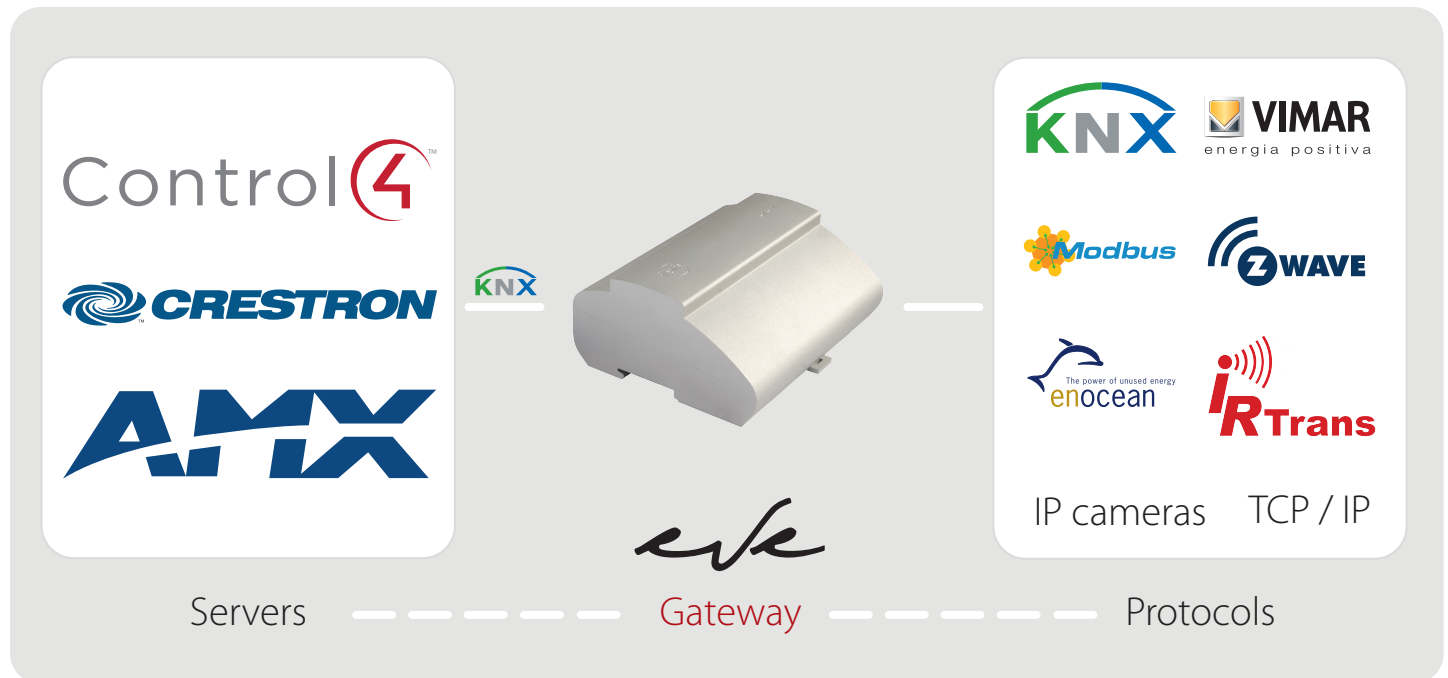

Recommended for smartphones

MAP Style

Recommended for tablets and TV

A BRIDGE THAT CONNECTS DIFFERENT WORLDS

EVE gives total freedom to installers and customers for choosing the desidered home automation system and devices. EVE can **manage several different protocols** at the same time and **act as gateway between them**.

QUICKLY CONFIGURE YOUR INSTALLATION

EVE configurator software provides the most effective **tools to minimize time to program** the control unit: **Web Server import** (Vimar) and **ETS import** (KNX) together with **Wizards** for a quick and easy configuration of other technologies are tools designed to **simplify and speed up the work** of system integrators.

Heating & Cooling Wizards:

GET YOUR EVE FOR FREE!

How best to try the product

We think the best way to test our product is to use it that is why we distribute a demo version of our server (EVE Suite Demo License). The demo server is full-featured, in this way you can try the product and decide if EVE is what you are looking for.

Get the server image from our website and easily install it on a Pc (virtual machine) or Raspberry Pi device. The demo server will expire after 7 days. Reinstall it as many times as you need to fully understand and master the product.

For further information, please visit this page: www.ilevia.com/learning-centre/first-project

TRY EVE RIGHT NOW!

Play with our live demo

Our showroom is fully automated and uses EVE as supervision system. The installation currently integrates KNX, Vimar By Me, IRTrans and Z-Wave technologies. To anyone who wants to experience the speed of EVE multibus system and evaluate its first class design, we recommend downloading *EVE* app and connect to our "Live Demo" account. You will immediately take control of our demo corner in real time from anywhere in the world.
